

➤ Security Warnings

- Only calls/text messages that are communicated with the GOLD LOCK application are secure, normal calls/text messages on the device are not secure.
- Don't let access to the secure phone device to people that you don't trust.
- Don't install software that you don't trust on the secure phone.
- For maximum security - it is recommended to switch off infra red and Bluetooth connections on the device.

➤ Pre Requisites

- Both sides must be working on the GSM network 900MHz, 1800MHz or 1900MHz.
- Both sides must be able to use "data calls" (CSD)
- Phone must be on GSM Network Mode – Go to Menu, Tools, Settings, Network, Network Mode – Choose GSM (Not Dual). The phone must be online with a SIM card inserted before performing this.
- To prevent installation errors relating to phone security policies: Go to Menu, Tools, Application Manager, Options, Settings. Make sure that "Software Installation" is ON, and that "Online certificate check" is OFF

 **User Manual** **Usage Instructions**

 • **Wait for 10 seconds after installation or phone boot, to enable the encryption software to load.**

 • **To initiate a call:**

- Press the "C" button until the GOLD LOCK application appears. You can also call the GOLD LOCK application by pressing the menu button and choosing the GOLD LOCK icon.
- Type the phone number you wish to call.
- If you want to choose a number from your contacts list, go to Options => Contacts and choose a contact name from there.
- To start dialing, press one time on the joystick button, or the green dialing button.
- You can begin the conversation after the message "Secure Call Started".

 • **To receive a call:**

- When your phone receives a secure call, the encryption software automatically detects it.
- Choose "Answer" or "Reject".

 • **To send a secure text message during a call:**

- While in a secure call, choose "Messages", then press on "Create Message".
- Type the text you wish to send (you can switch between languages and numbers using the PEN key).
- Press once on the joystick to send the message.

 • **Volume control: you can easily raise or lower the hearing volume with the joystick button (to raise push button up, to lower push button down).**
