Security Warnings

- Only calls/text messages which are communicated with GOLD LOCK are secure, normal calls/text messages on the device are not secure.
- Do not allow access to the secure phone device by other people.
- Do not allow installation of non-trusted software on the secure phone.
- For maximum security - it is recommended to switch off infra red and Bluetooth connections on the secure phone

Installation

1. Open the BlackBerry Internet Browser
Point the Browser to one of the following URLs according to the OS version of your handset (Note: LINKS ARE CASE SENSITIVE).
Blackberry OS 4.6:
<https://s3.amazonaws.com/GLDownloads/BB4.6/GoldLock.jad>

Blackberry OS 5.0:
<https://s3.amazonaws.com/GLDownloads/BB5.0/GoldLock.jad>

Blackberry OS 6.0
<https://s3.amazonaws.com/GLDownloads/BB6.0/GoldLock.jad>
2. A screen appears containing the application details with a choice to either “Set application permissions,” “Download,” or “Cancel”.
Press “**Download**”
3. The download will start
4. You may be prompted to reboot your BlackBerry before being able to use the application. Do not reboot now.

Setting Permissions

1. On the general BlackBerry menu, go to Options
2. Select "Applications"
3. Select "Gold Lock"
4. Press the "Menu" button and choose "Edit Permissions"
5. Make sure all options are set to "Allow"
6. Exit
7. Do the same for the module named: "GLChild"
8. Once again, select "Gold Lock"
9. Press the "Menu" button and choose "Edit Default Permissions"
10. Make sure everything is on "Allow"
11. Exit.
12. Remove battery from the back of your device, after 10 seconds insert again and turn device back on.

APN Configuration

1. From the general Blackberry menu select "Options"
2. Select "Advanced Options"
3. Select "TCP/IP"
4. Tick "APN Settings Enabled"
5. Enter the APN as provided by your mobile carrier
6. Tick "APN Authentication Enabled" *

*APN Authentication is sometimes required by the mobile carrier. APN Authentication requires a "Username" and a "Password". These are network specific and can be found by searching on the web or referring to the network provider's support helpline.

Configuration

- From the phone's applications menu, click on Gold Lock Enterprise.
- After application is started, select Menu => Settings
- To enable Gold Lock to automatically load when the phone is started, Select: Auto Start Gold Lock = Yes.

- In the "Settings" screen, the following parameters are available:
 - **Server:** you can set the server address which manages VOIP traffic (default - Gold Lock Secure Server).
 - **Auto-start Gold Lock-** If set to "Yes"; Gold Lock automatically loads when the phone is turned on.
 - **Auto Connect-** If set to "Yes", Gold Lock automatically connects on startup.
 - **Ringtone** - Enables to switch between the default ring tone, and any other ring tone you select.
 - **Language** - Enables to change the application language.

- When Gold Lock is first activated, you will need to input the following details:
 - **Login details** - the email and password of your Gold Lock account (if you do not yet have those, please sign up at www.gold-lock.com)
 - **Select a name for your secure device.** This will be used by you and your secure contacts to identify your device.

Usage

4.1 Quick Load

To quickly load the Gold Lock secure interface, press the "c" button for 1 second (only available if Gold Lock was previously loaded manually or by selecting "Auto Start Gold Lock")

4.2 Add Secure Contact

Select Menu => Add Contact

Insert the device name of your secure contact and confirm.

4.3 Secure Voice call

At least one secure contact needs to be in your contact list. Blue colored locks are devices that are online.

To initiate a secure voice call, highlight a secure contact, then press the "Dial" green button or select Menu => Call (contact has to be online)

4.4 Secure Text

To send a secure text message, highlight a secure contact, then select Menu => Text (contact has to be online)

Inset text, then press the left button "Send".

4.5 Secure File Transfer

To securely send a file, highlight a secure contact, then select Menu => File (contact has to be online)
Select the file you wish to send, secure transfer will then begin.

4.6 Multiple Tabs

Each secure conversation, text or file transfer is displayed in a separate tab, you can freely switch between tabs during calls

4.7 Manage Secure Contacts

Sign in to your account at www.gold-lock.com to manage everything related to your device and secure contacts.
